

# What is Being Proposed?

- An increase in the permitted maximum amount of waste that the Prima Deshecha Landfill is permitted to accept daily from 4,000 tons per day (TPD) to 8,000 TPD.
- An allowance for up to 36 operational emergency days on which the 8,000 TPD limit could be exceeded.
  - If another OC Waste & Recycling facility is temporarily closed, such as due to a freeway closure or other unforeseen event, waste could be diverted to the Prima Deshecha Landfill

## Why is this happening now?

- Imminent Olinda Alpha Landfill closure will require diversion of tonnage to other OCWR landfills, including Prima Deshecha Landfill.

The proposed project does not include changes to the types or locations of approved activities within the Landfill development areas
