Thursday, September 13, 2018

Agenda Item 6—*Location of December 13, 2018 Meeting*

Chairman Johnson will propose holding the meeting at the Discovery Cube and will ask Commissioners for discussion.

Meeting Location

Pursuant to the Waste Management Commission (WMC) bylaws, the WMC has authority to set the time and location of its meetings. Under the Ralph M. Brown Act, (the Act) a meeting located at the Cube would be considered a “Special Meeting” and would, at a minimum, need to follow specific notice requirements.

Under the Act, the presiding officer or a majority of the WMC may call a Special Meeting.

Additionally, a Special Meeting must be noticed at a minimum of 24 hours in advance of the meeting to all of the legislative body members and to all media outlets and people who have requested notification of WMC meetings. The notice also must be posted in a location freely accessible to the public and should also be posted on OCWR’s WMC website. Notice must include the time, place and business to be transacted at the meeting.

Several conditions must be met to have the meeting at the Cube:

1. The meeting must be open to the public.
2. Any tour that is offered of the museum must be offered to all attendees of the meeting. (Please Note: There is no gift issue here because the Cube is not offering free admission, but rather providing a supervised tour. The Cube won’t be opening its doors and letting everyone do whatever they want while they are there.)
3. WMC members need to be advised not to discuss WMC issues in groups of nine or more (a quorum), because that would be considered a violation of the Brown Act. Instead, WMC members should enjoy the tour and refrain from discussing WMC business. If they want to discuss their experience, they can discuss their impressions at the next WMC meeting, or alternatively reconvene the meeting after the tour and have the discussion in open session.

Recommended Action: Discuss the logistical requirements for holding a public meeting at a different venue.
A vote will be required.

Agenda Item 7—*Waste Industry Presentation*

OC Waste & Recycling Director Tom Koutroulis will present “Legislative Impacts to Orange County’s Free Diversion,” which includes the challenges and opportunities of using processed green waste (PGM) as alternative daily cover (ADC) from a local and state perspective.

Diversion is a critical component for Orange County cities and haulers as they configure their waste management operations to meet the regulatory changes mandated by AB 1594 and pending legislation SB 1383. Currently, the landfills provide diversion for Orange County cities through the use of PGM as ADC. The current diversion is provided to Orange County cities without charge. In addition to providing diversion for the cities, it provides the landfills with a local resource used for the cover of waste and as erosion control. Under AB 1594, ADC will no longer count as diversion starting January of 2020 and it will count as disposal.

Recommended Action: Receive and file report.
